13.10–13.40

Discussion & networking

13.40

Lunch

Port of Helsingborg

LNG liquefaction plant in the Port of Helsingborg

Investment activity planned in the Port of Helsingborg aims at a new liquefaction plant, a storage horizontal pressure steel tank and a filling station for tank trucks. The Activity will launch fuelling services for vessels and vehicles in the adjacent areas.

Port of Klaipėda

LNG Reloading Station by Klaipėdos Nafta

Klaipėdos nafta will implement a multipurpose and publicly accessible LNG reloading station that will be connected to the Floating Storage and Regasification Unit – a large scale LNG terminal via a mobile multifunctional refuelling station for transport purposes.
